# Calcium Borogluconate 23%

## Sterile Injection

For the treatment of Milk Fever

DIN 01985280

### *Veterinary Use Only*

#### **ACTIVE INGREDIENTS:**

Calcium Borogluconate BPVet ..... 23 % w/v  
(equivalent to 19.14 mg/mL of calcium)

#### **INDICATIONS:**

As a source of calcium for cattle, sheep and swine, to aid in the treatment of hypocalcemia, e.g., milk fever in cattle.

#### **DIRECTIONS:**

Administer slowly by intravenous or subcutaneous injection. Intravenous administration is recommended for the treatment of acute conditions. When administered subcutaneously, the dose should be divided over several sites. Warm the solution to body temperature prior to use. Use aseptic technique for administration. Dosage may be repeated after several hours if required or as recommended by a veterinarian.

#### **DOSAGE:**

Adult Cattle ..... 250 to 500 mL  
Adult Sheep and Swine ..... 50 to 125 mL  
or as recommended by a veterinarian.

#### **CAUTIONS:**

Use only if solution is clear. If no improvement is noticed in the condition being treated after 24 hours or less depending on the severity of the condition, the diagnosis should be re-evaluated and a veterinarian consulted. Do not retain partially used vial. Contains no preservative.

#### **STORAGE:**

Store between 15°C and 30°C. Keep from freezing.

#### **WARNING: Keep out of reach of children.**
