See reverse side for Administration and Dosage.

Sodium Iodide

200 mg/mL Injection

Sterile

DIN 00604267

Veterinary Use Only

ACTIVE INGREDIENT: Each mL contains:

Sodium iodide..... 200 mg

Preservatives:

Benzyl alcohol..... 0.25% w/v

Methylparaben..... 0.03% w/v

Propylparaben..... 0.025% w/v

INDICATIONS:

As an aid in the treatment of actinomycosis and actinobacillosis in cattle and as an expectorant in mild respiratory disease of cattle, horses and sheep.

DOSAGE: Administer by intravenous injection.

Cattle: Actinomycosis and actinobacillosis: 15 mL per 45 kg body weight. Repeat in 7-10 days.

Cattle, Horses and Sheep: As expectorant: 1 to 3 mL per 40 kg body weight. Repeat in 7-10 days if necessary.

CONTRAINDICATIONS: Contraindicated in hyperthyroidism, advanced pregnancy and acute metal poisoning.

CAUTION:

Discontinue immediately if toxic signs such as excessive lacrimation, dyspnea or tachypnea occur. Subcutaneous injection causes severe irritation and local swelling.

STORAGE: Store at 15°-25°C

WARNING: KEEP OUT OF REACH OF CHILDREN
